

Title: The Bioeconomy - Enabling the European Green Deal in Challenging Times

The European Commission is organising the conference 'The Bioeconomy - Enabling the European Green Deal in Challenging Times' on 6 - 7 October in Brussels.

This hybrid conference will provide an opportunity to present the findings of the [EU Bioeconomy Strategy Progress Report](#), adopted in June 2022, as well as a series of bioeconomy success stories from EU research and innovation. The agenda will also include sessions to discuss how the bioeconomy can help to better manage certain trade-offs, by addressing the question of how increasing biomass demand for energy and industrial needs can be matched with increasing climate and biodiversity objectives.
