

Title: Sustainable Chemistry to solve global challenges: the new SusChem Strategic Research and Innovation Agenda

SusChem presents an exciting day of speeches and panels that will explore the technological priorities of the new Strategic Innovation and Research Agenda (SIRA). This will include an open debate on the subject "**Circular economy and the energy transition: an innovation challenge across value chains**".

Focussed on the digital transformation of the chemical sector and how it triggered the transition to a circular economy, this event includes a keynote speech by Peter Dröll, Directorate-General for Research and Innovation, Prosperity at the European Commission. The event is open to a wide audience with the hope of attracting an interdisciplinary crowd able to address common innovation challenges.
