

Title: EU Green Week 2020

Nature and biodiversity are the themes of EU Green Week 2020, which will take place in Brussels this coming June. This is the biggest annual event on the European environment policy calendar, providing an opportunity for stakeholder debate at all levels.

While the main events will take place in Brussels, many side events with partner organisations will take place across Europe.

The event will explore possible pathways for change and examine how EU policies, like the European Green Deal, will help to protect, restore and sustainably manage nature. EU Green Week 2020 will take place from 20 to 22 October 2020. The partner events can take place between September and October.
