

Title: LIFE information and networking day

As the European Commission has [announced](#) more funding for LIFE projects, further calls for proposals will be launched in April. An information and networking day about the LIFE call for project proposals will be held online at the end of April.

The morning session will highlight changes to the programme from previous years, while the afternoon will be dedicated to networking with other participants, sharing experience and matching with potential partners. Representatives from the LIFE project and the EC will also be present.

The main topics covered by LIFE are:

- Environmental technologies and solutions, including water, waste, air quality, soil, forest, health
- Climate change adaptation
- Climate change mitigation
- Nature conservation and biodiversity
- Climate and environmental governance and information initiatives.

To register for the information day, please click [here](#).
