

Title: EU Green Week: Finnish municipalities contributing to super year of nature

As part of EU Green Week, several Finnish municipalities are coming together for an event to share their contributions to biodiversity protection. The super year for nature and biodiversity 2020 highlights the depletion of natural systems and this event will share encouraging activities from Finland.

As part of the two-hour event, Tampere region will present ERRIN's project [UNaLab](#) and the work being done with urban nature-based solutions in Tampere. Read more about the UNaLab project [here](#).

The event will be opened by MEP Miapetra Kumpula-Natri and will include present various means of biodiversity protection in various environments.

For more information see the attached poster, register [here](#) before 20 October.
