

## Title: European Online Week of Active & Healthy Ageing

The EIP on AHA, the AAL programme and JPI MYBL are coming together to organise the European Week of Active & Healthy Ageing (EWAHA). The three initiatives are all working on putting demographic change more prominently onto Europe's research and innovation agenda. This week of debates and panels, discussions and webinars, will focus on priorities, strategies and action in the area.

The week's events will include participation from high-profile thinkers from international bodies and the European Parliament, as well as policymakers and experts on health, care and ageing.
