

Title: Reducing Food Waste from Farm to Fork - Conference and B2B online event

The [REAMIT](#) project proposes to adapt and apply existing innovative technology to food supply chains, to reduce food waste and hence improve resource efficiency. So join the event to discover useful solutions to reduce food waste !

The event has 3 main objectives:

- Raise awareness of the problem of food waste,
- Present the work carried out by the REAMIT project team: adapting existing innovative technologies (new generation sensors, IoT, big data, etc.) and applying them to the management of the agri-food supply chain to meet the objective of halving food waste by 2030
- Provide food companies with digital and technological solutions to the problems they encounter throughout the supply chain, thanks to B2B meetings and testimonials.

See more [here](#).

* The event is free of cost. The event into two half days: the conference will take place on the 5th of November and the B2B meetings on the 6th.
