

Title: What future for European Robotics? - Science for Policy Conference

Next week a three-day Science for Policy conference will discuss the future of robotics in European economic growth and recovery. Organised by the Joint Research Centre, the conference will take a scientific, policy-oriented and EU-centre analysis of the technology.

Covering technical, economic and social aspects, the conference will include sessions on:

- Impact of robotisation on employment, productivity and competitiveness
- The social impact of AI and robotics
- Robotics in education
- Regulatory frameworks.
