

Title: Nature-based solutions for circular water systems

**The UNaLab project, in which ERRIN is a partner, is organising a webinar on nature-based solutions for circular water systems on 24 March 2021, between 10:00-11:30 CET.**

The webinar aims to expand the knowledge on nature-based solutions for circular water systems, that is for water retention and reuse, among the network of UNaLab cities and beyond. During the webinar, practical examples and successful case studies related to water management systems, such as rainwater harvesting and reuse as well as in-situ treatment of grey waters, will be presented.
