

Title: European Innovation Ecosystem roundtable: fostering common understanding

ERRIN, together with the Helsinki EU Office and Helsinki-Uusimaa Regional Council, is organising a webinar on **European Innovation Ecosystems**.

The round table brings together different innovation ecosystem stakeholders and several European Commission services to share their views on place-based innovation ecosystems. The discussions aim to explore perspectives, practices and challenges and foster 'out of silos' collaboration among the stakeholders. The objective is to launch a debate and process to improve Europe's research and innovation performance through a more coherent perception and improved understanding of innovation ecosystems and their crucial role in the R&I landscape.

The event agenda is attached. **Please note that the webinar is by invitation only**, please direct any questions to hilary.webb@errin.eu.
