

Title: Cultural Heritage & Tourism: Towards zero-pollution tourism (Green Week Partner Event)

In the frame of the EU Green Week 2021, the ERRIN Cultural Heritage & Tourism Working Group will host an online Partner Event focused on sustainable practices towards zero-pollution tourism. The event will take place online and will be open to members and non-members.

An EU-wide response to the crisis is crucial for the survival of the tourism sector, but the recovery also relies on regional authorities and stakeholders leading the way towards a green and digital transition of the sector through innovative and sustainable models of tourism.

In addition to external presentations, this meeting will represent an occasion to learn about regional good practices in sustainable tourism.

Please see the attached files for the updated agenda and the profiles of the organisations involved.

Registrations to the meeting are now closed.
