

Title: Hydrogen Networking Activity with the Quebec-Europe Research and Innovation Circle

The Quebec-Europe Research and Innovation Circle, in partnership with the Quebec Government Office in Brussels and the Quebec Smart Energy Network is organising a networking activity on the development of hydrogen-related technologies in the context of Horizon Europe.

The event will feature presentations from the Quebec Smart Energy Network and the Wales Hydrogen Trade Association as well a discussion on the partnership between Hydro-Quebec and the University of South Wales on the commercialisation of hydrogen storage technologies. There will also be working sessions led by Quebec and European experts on 4 Horizon Europe calls to develop joint hydrogen projects. The featured calls are:

HORIZON-CL5-2022-D3-01-13 Energy system modelling, optimisation and planning tools

HORIZON-CL5-2022-D3-01-15 Decarbonising industry with CCUS

HORIZON-CL5-2021-D3-01-04 Clean Energy Transition

HORIZON-CL5-2021-D5-01-07 Enabling the safe and efficient on-board storage and integration within ships of large quantities of ammonia and hydrogen fuels (ZEWT Partnership)
