

Title: Conference on air quality - the PO Basin together for the quality of air

The PREPAIR project is having a conference on domestic woody biomass combustion. Consumption in the Po Valley and strategies for reducing emissions into the atmosphere: the impact of residential firewood and pellet combustion will be explored through the main results of PREPAIR's actions and the involvement of some national experts on air emissions and energy scenarios.

The event will be streamed on Zoom, please register [here](#).

This is the mid term conference of the Life integrated project on air quality, that aims to ameliorate Air quality in the PO Basin. The project focuses on 4 mainareas: biomass burning, energy efficiency, transport and agriculture.
