

Title: Baltic Sea ports as drivers of the sustainable blue economy: making the Green Deal a reality

[SEArice](#) organises a seminar dedicated to Baltic Sea ports as drivers of the sustainable blue economy, with the Informal Baltic Sea group and the [CPMR Baltic Sea Commission](#), with the support of the [Conference of Peripheral Maritime Regions](#). The seminar will take place online on Friday, 22 October at 10:00-12:00 CEST.

Ports do not only play an important role in connecting regions, creating jobs and growth, they can also contribute to delivering carbon neutrality and the European Green Deal. They have the potential of becoming gateways of sustainable blue economy, key hubs in delivering clean energy, green transport, circular economy and digital transformation. Baltic Sea ports are at the forefront of this process and this seminar will seek to outline current developments, future visions and ways to support transition in the region.

You may find the agenda attached. Learn more about the seminar and register [here](#).
