

Title: Join the MOSAIC Community of Practice
Thu, 12/05/2022 - 12:00

ERRIN's project MOSAIC will soon announce its Pilot and Replicator Cities that will make up the MOSAIC Community of Practice alongside the project's co-creation experts and a wider group of additional cities working in the context of the Mission on climate-neutral and smart cities. If your city wants to reach climate-neutrality through inclusive, quadruple-helix co-creation processes, apply to join the MOSAIC Community of Practice and attend our first workshop on 14 June in Brussels!

Both cities selected or not selected to be part of the 100 Mission Cities can join the MOSAIC Community of Practice, to learn from our pilot and replicator cities' experiences on the ground as they learn about and test the MOSAIC co-creation methodology.

Learn more about the opportunity to join the MOSAIC Community of Practice on [this dedicated page](#) and direct any questions to MOSAIC@errin.eu - ERRIN is responsible for the Community of Practice. More information about the workshop in June will be available soon.
