

## Conference

### Preventing Flooding Risks By Making Resilient Communities Emilia-Romagna Region – Delegation to the EU, Rue Montoyer 21

15th October 2018, 17:00 – 20:00

*The aim of the workshop is to present the results of the LIFE project PRIMES Preventing flooding Risks by Making resilient communities.*

*The project has been developed in three Italian Regions: Emilia-Romagna, Marche e Abruzzo with the aim to reducing land and population damages caused by events like floods, inundations and sea storms. It has helped in building resilient communities that can actively participate in hazard prevention policies and in developing harmonized procedures at interregional level through reinforced coordination among local systems of civil protection.*

*The conference will also present the last EU development related to the environment and prevention policies and related resources.*
