

GREEN AND SMART MOBILITY

NEW SOLUTIONS FOR THE MOBILITY OF THE FUTURE

10 OCTOBER 2019 - BRUSSELS

- What are the newest solutions carmakers and service providers are coming up with to solve technological challenges regarding battery electric and hydrogen fuel-cell vehicles?
- How can deployment of shared, clean, smart and on demand mobility solutions for people and freight help cities in dealing with congestion, better use of space, livability, clean air and inclusion?
- How are policy makers managing the infrastructural and industrial transition involving these new technologies?
