

WHAT IS THE I4MS INITIATIVE (ICT FOR MANUFACTURING SMES)?

I4MS (ICT Innovation for Manufacturing SMEs) is the initiative promoted by the European Commission to foster the digital innovation of manufacturing SMEs in Europe in order to boost their competitiveness in the digital era. With a global budget of 34M€, the I4MS initiative comprises 15 Innovation Actions that offer technological and financial support to SMEs to experiment with different ICT enabling technologies and offer services to improve SMEs' innovation skills.

INNOVATION ACTIONS:

WHAT DOES IT MEAN TO BECOME A SUPPORTIVE PARTNER?

- Be formally linked to I4MS initiative to replicate solutions and services.
- Connect with key stakeholders of the Industry 4.0 ecosystem.
- Have access to first-hand information about digital transformation, trending topics and funding opportunities.
- Participate in the I4MS online community.

WHAT WE OFFER YOU:

Visibility

Exposure in our communication channels: Share your activities with I4MS followers across our social media channels (Newsletter, Twitter & LinkedIn).

Special Content

Latest market trends, featured articles, funding opportunities, and I4MS opportunities like open calls launches, awards and events.

Access to I4MS Community

The I4MS community brings together all the key players of the smart manufacturing industry in Europe working for the digitisation of manufacturing SMEs.

Exclusivity

Participate in special activities exclusively for our community members (webinar offer, become I4MS Ambassador, interviews, participate in online).

WHAT WE ASK FOR IN RETURN:

Visibility

Exposure in your communication channels disseminating key content (open calls, articles, etc.).

Support

Encourage the participation of SMEs and mid-caps in I4MS Open Calls.
