

TRANSPORT WORKING GROUP

The Sustainable and Smart Mobility Strategy

09 FEBRUARY | 10.00-12.00

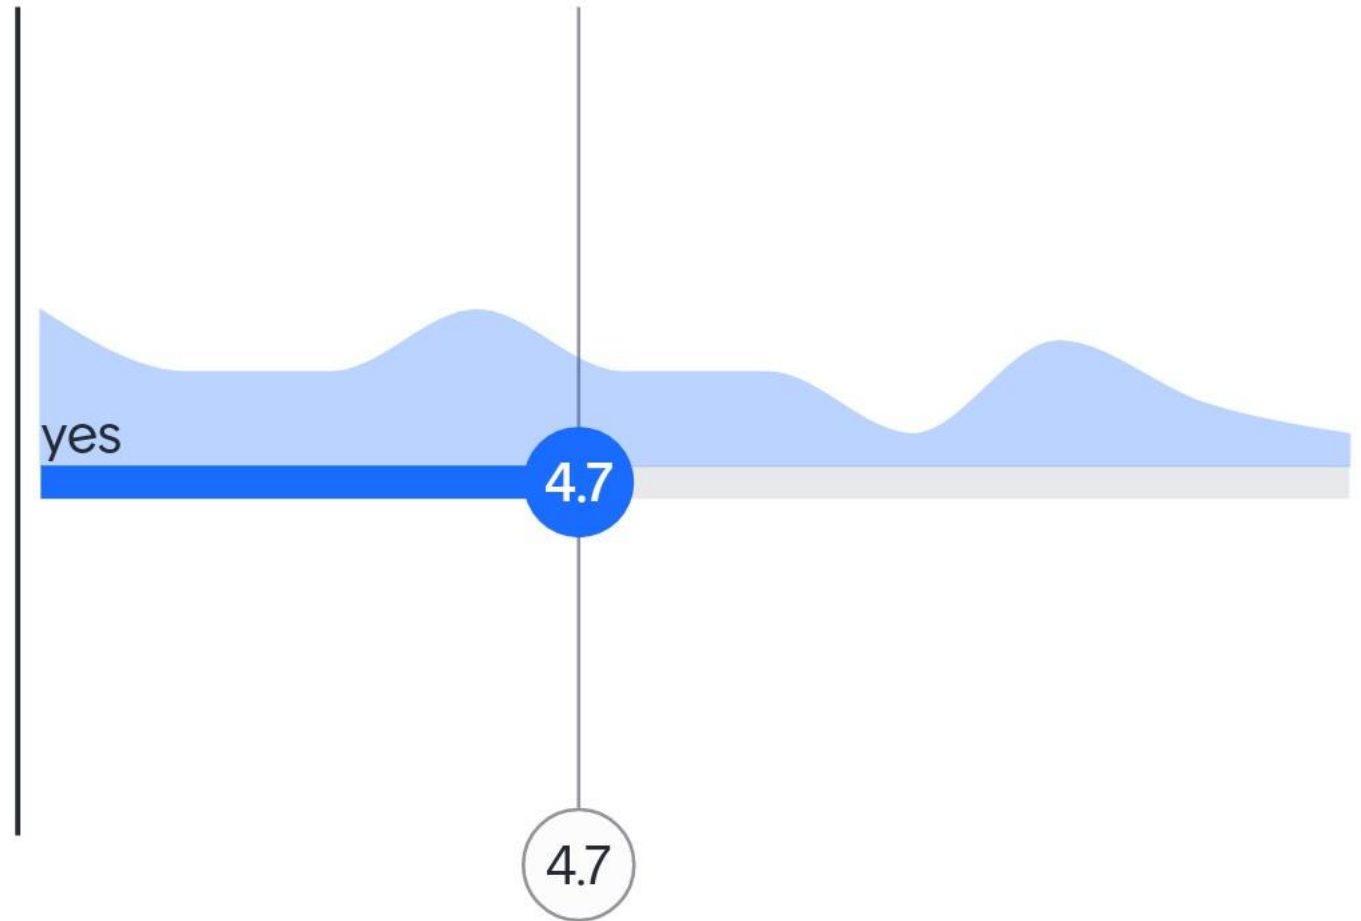

ERRIN European Regions
Research and Innovation Network

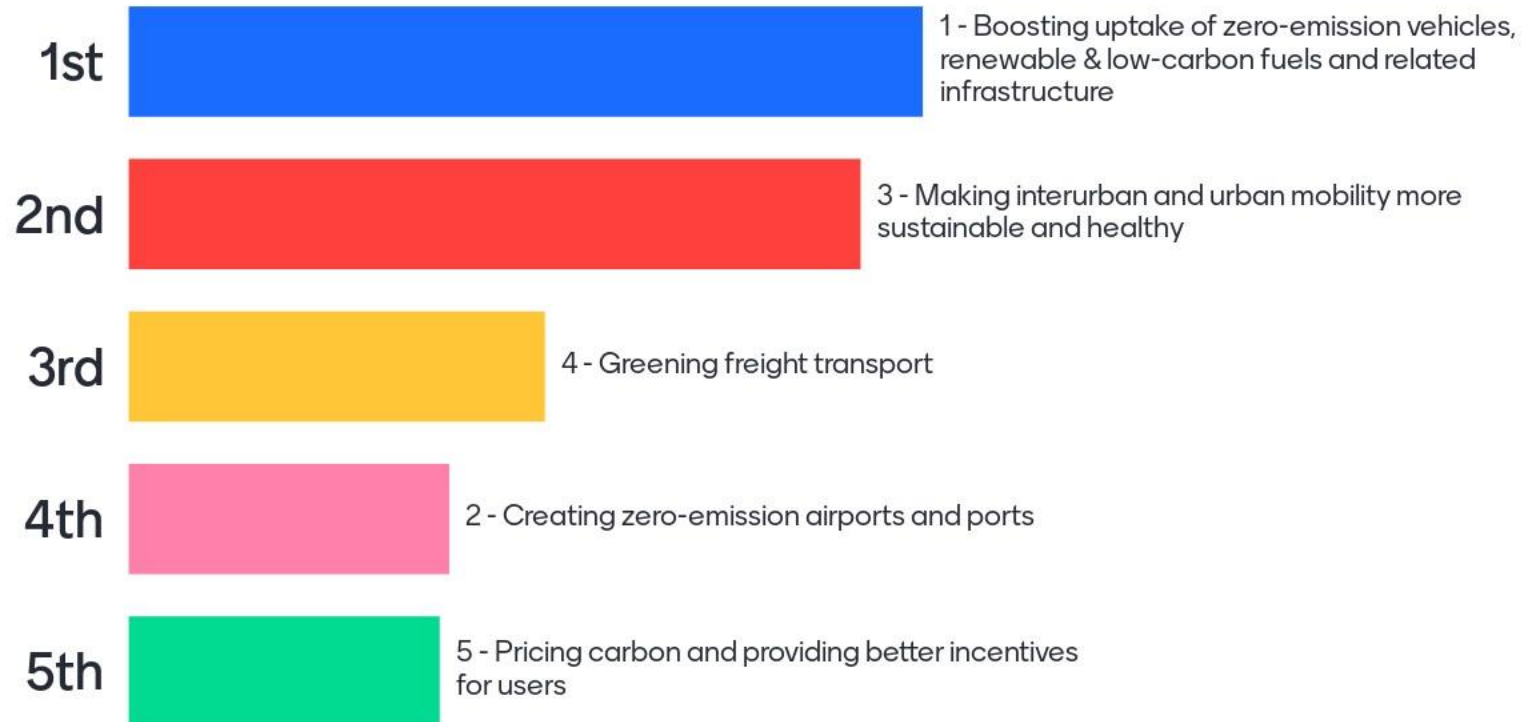

@ERRINNetwork

Do you already know the Sustainable and Smart Mobility Strategy?

Please rank the flagships in importance for your region

Do you have any specific priority for Flagships 6 and 7?

Revision of ITS directive

Revision of the ITS directive

its

Automated multimodal mobility

ITS

Induced energy use of automated transport

Automated and multimodal mobility

Public acceptability

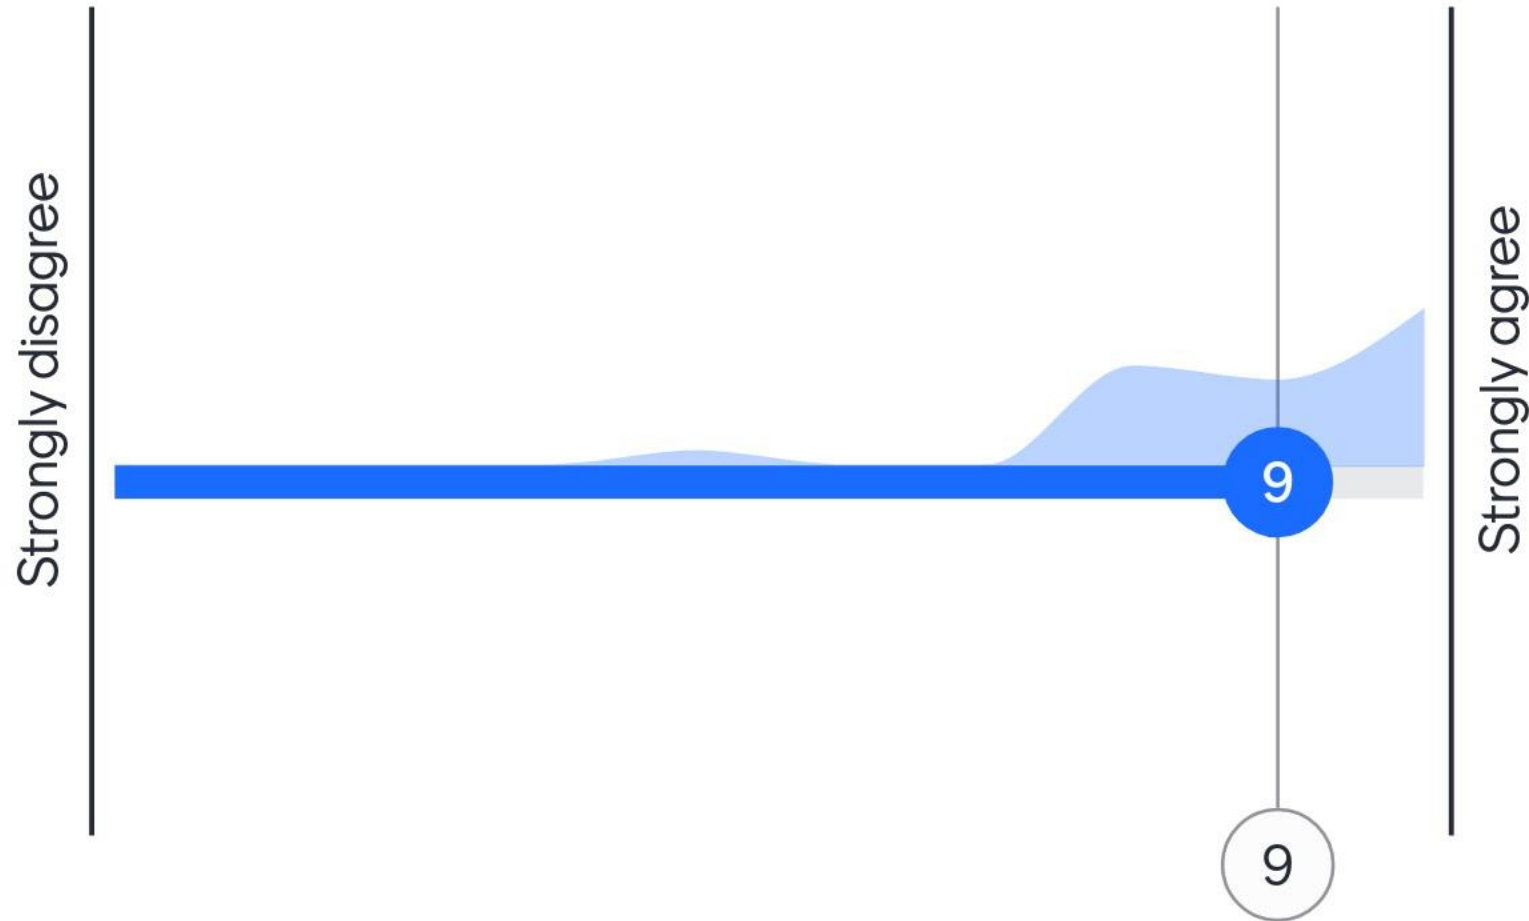

Data access and exchange rules

Automated multimodal mobility

CCAM partnership

Automation and optimization of transport is complex and consists of many potential ODD. Do we need to look into the method of type of type approval of of the automation system of vehicles at European level. and align them with ODD categories.

Do you want ERRIN to organise a specific event on the flagships?

Would you like to add any other priority/activity to the Work Plan?

Maas

Intermodalité

Intermodality and hydrogen train

Green ports

Green ports

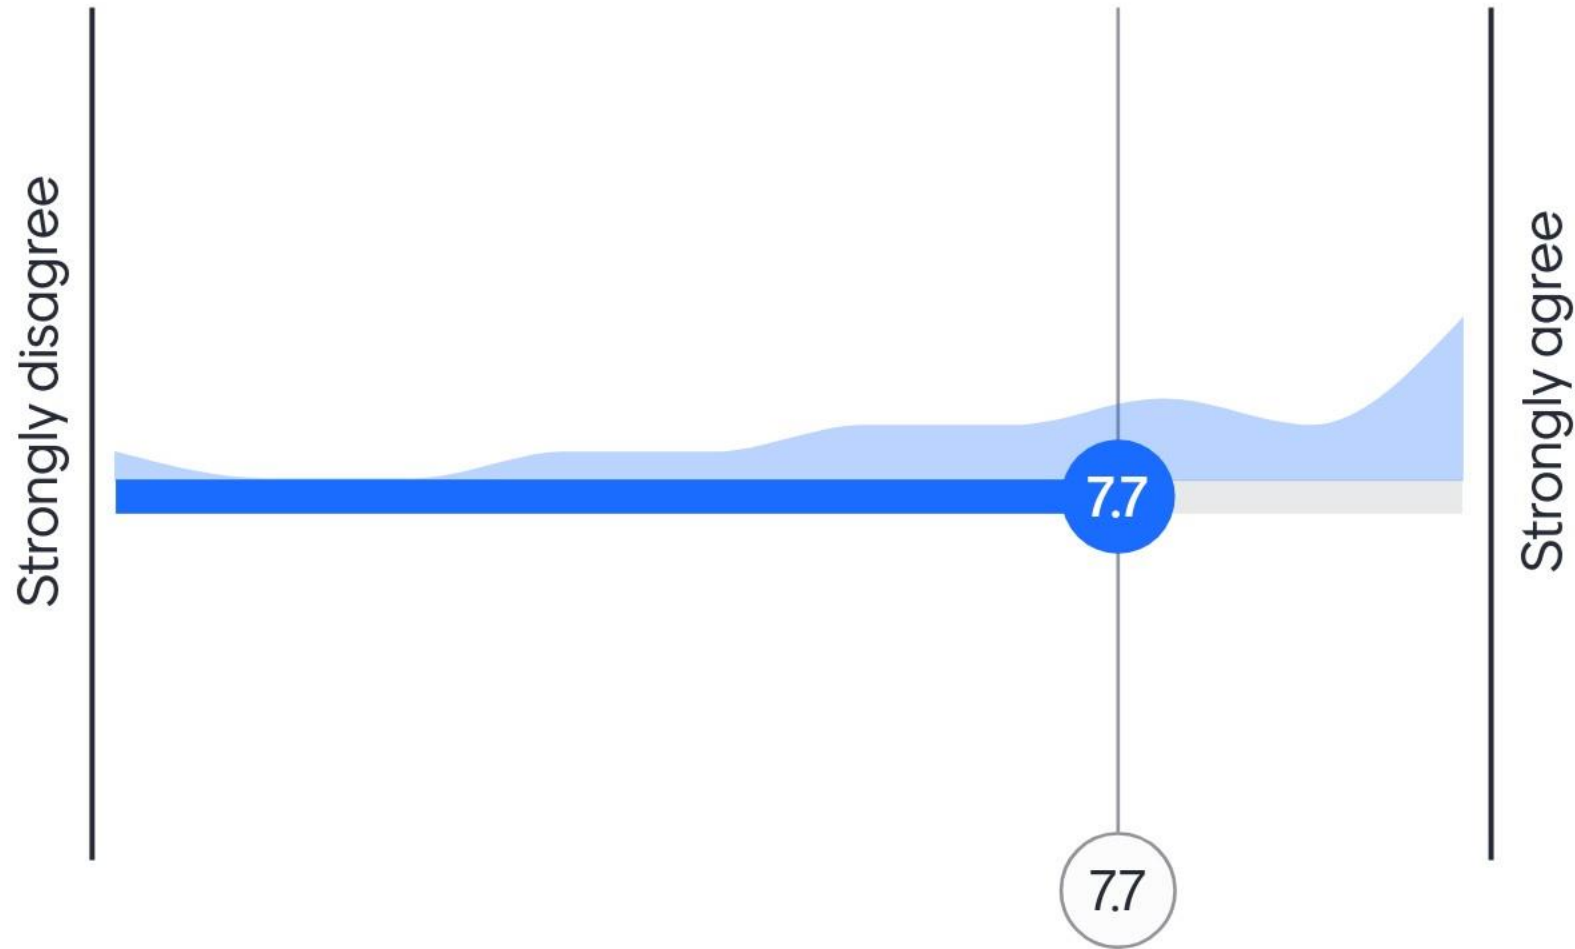

Planned priorities/activities: perfect :)

Green airports

Autonomous and intelligent transport. Also, Horizon Europe partnerships relevant to this and other mobility topics.

Green ports could be done together with Blue Growth WG ?

Are you interested in planning any activity on the European Year of Rail with ERRIN?

How can ERRIN be involved in the EU year of Rail? Do you have any idea/suggestion? Are you planning/organising any initiative?

Hydrogen train

Hold an event during the launch - connect the members, highlight best practices from different regions

Our region is interested in an event about 'European Regions for European trains'

Best practice/policy session around rail initiative+TEN-T proposal in Q3?

event in rail stations or running event

In Flanders we are missing some cross-border rail connections, that we would like to put on the agenda. We are interested in exploring if this is possible in the context of ERRIN.

Interested in greening of freight train

Information concerning additional research opportunities concerning train (technology, infrastructure etc)
