## Online Conference

### **EMBRACING DEMENTIA** **How to create dementia friendly and inclusive societies** **Tuesday the 16<sup>th</sup> of November 2021**

The EDEN project has been conceived to support relatives, health care professionals and local communities, in their collaboration and effort to create better lives for people living with dementia.

EDEN has developed solutions and material that can support local stakeholders to collaborate better and create more dementia friendly and inclusive societies that correspond better to the needs of people living with dementia and their relatives, and therefore are more sustainable.

We are organising a conference to show the results from the project, as well as debating and raising the awareness about the needs of people living with dementia and their relatives, and how we can embrace dementia as a community challenge and not as an individual challenge.

Before the conference, we invite you to visit our learning platform

<http://embracingdementia.eu/>
