CREDIBLE
EU carbon farming

Climate-KIC

Building momentum and trust to
achieve credible soil carbon farming
in the EU

Started on June the 1st, 2023

Funded under topic HORIZON-MISS-2022-SOIL-01-06 (CSA):
'Network on carbon farming for agricultural and forest soils'

Challenge 1:

High fragmentation of knowledge,
data and monitoring approaches.

Action:

Integrate initiatives and actors into a consensus
generating process articulated around focus groups
and summits.

1st European Carbon Farming Summit

Save the date!

5-6-7

March ²⁰²⁴

Contribution submission
will open soon

Place

Valencia

Which practices for European soils?

Regional agrosystems
Farmer acceptance
Co-benefits
Trade-offs
Value Chains

What standards and certification mechanisms?

Quality Criteria
Baselining
Overlapping schemes
Additionality
Offsetting and claims

How to monitor carbon fluxes?

Data harmonization
Model calibration
Emerging technologies
Remote Sensing
Monitoring initiatives

Any question please email to:
saskia.keesstra@climate-kic.org

Organised by:

CREDIBLE
EU carbon farming

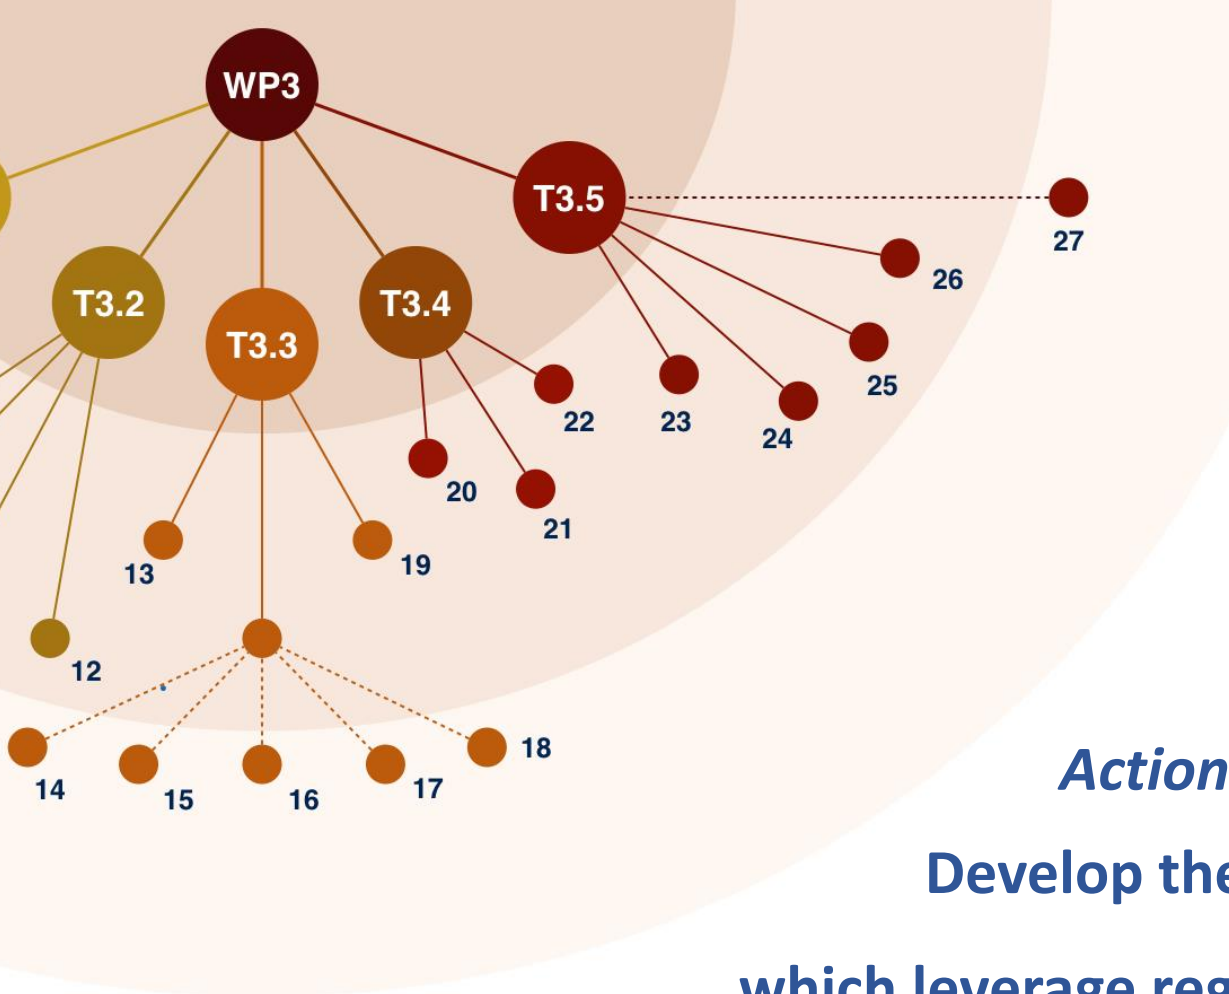

Climate-KIC

I N N O V A

Funded by
the European Union

Challenge 2:

Trade-offs between monitoring costs and accuracy exacerbate when looking at the farm level.

Action:

Develop the concept ‘fit-for-region’ carbon schemes, which leverage regional knowledge and the presence of structured value chains for scaling up practices.
