## ESD TALK #1:

# EUROPEAN PROGRESS ON INTEGRATING SUSTAINABLE DEVELOPMENT IN EDUCATION

When: 23 January 2023 14.00-15.00

Where: Online webinar. Register [here](#).

We are thrilled to launch our new series of ESD Talks, focusing on the European progress on integrating green skills and competences in education. The webinar is hosted by the Erasmus+ project TEACH4SD, which aims to develop and support education in sustainable development across European Member States and beyond. The webinar is open to everyone. In our first edition we are proud to welcome Vera Leuner, Policy Officer in DG Employment, Social Affairs & Inclusion, as the main speaker who will share the European Commission's initiatives on skills for the green transition. This webinar marks the first ESD Talk out of four annual sessions during the four-year project. Join us as we address the current European state of art on green skills in education with our fellow EU partners.

Want to know more about TEACH4SD?

More information on the project is available on the official website [here](#). In the future TEACH4SD will release a quarterly newsletter providing insights to the development of the project. Follow the project on LinkedIn [here](#) for updates on the project and the upcoming newsletter.
