16:00	Update from the Transport WG: 2024 work plan and new project development tool

PRESENTATION OF THE NEW ERRIN PROJECT DEVELOPMENT TOOL

Gaia Marotta, ERRIN Secretariat

REVAMPED PROJECT DEVELOPMENT TOOL

The tool will expand the existing partner search section of the website to include a bottom-up mapping of the interests of the ERRIN membership. New features include:

- Allows users to express members' interest in pre-identified calls, leading to simplified project development activities within the WGs
- Three ways to express interest (via a form):
 - Express interest in a call
 - Express interest on behalf of a regional stakeholder
 - Present a project idea through a partner search (open to non-members as coordinators)
- Enhanced notification system
- ERRIN Working Groups and Clusters to conduct follow-up activities through dedicated project development sessions when necessary

Discover the newly launched Project Development Tool [here!](#)

You are currently viewing 72 open calls.
Use the filters below to further refine your search.

Are you curious to discover how many people have also shown interest in a specific call?
Simply express your interest using the button below, and upon doing so, a new button will be activated,
granting you access to view all other expressions of interest.

OVERVIEW OF PUBLISHED CALLS

LOW CARBON CLUSTER

ERRIN's Project Development Tool (PDT) acts as a central hub for our members to explore, express interest and engage with a variety of funding opportunities. This tool is designed to streamline the process of project development, fostering collaboration and alignment with ERRIN's goals.

In this section you can find pre-selected calls by the ERRIN secretariat of interest to the Low Carbon Cluster. We encourage all members and their stakeholders to actively use these features to maximise project opportunities.

[Home](#) > [Low Carbon Cluster](#)

HOW DOES THE PROJECT DEVELOPMENT TOOL WORK?

The PDT serves as an effective platform for fostering collaboration and increasing project opportunities for ERRIN members, ensuring a **bottom-up process** tailored to the members interests. By navigating the tool, you can:

- **Access a comprehensive list of calls for proposals** sourced directly from the European Commission's Funding and Tenders Portal, pre-selected by the ERRIN secretariat;
- **Express your interest** on behalf of your organisation or of your stakeholders;
- **Connect** with members who have expressed interest in the same calls, fostering collaboration and partnership opportunities.

The follow-up actions are facilitated by an enhanced notification system, allowing members who have expressed interest in the same calls to initiate discussions, exchange ideas and further explore potential collaboration.

Additionally, high interest in particular calls will trigger the organisation of activities, such as matchmaking sessions or project development workshops, through ERRIN Working Groups and Task Forces.

Explore the ERRIN project development tool, a gateway to your next project!

RESILIENT AND SECURE URBAN PLANNING AND NEW TOOLS FOR EU TERRITORIAL ENTITIES

CALL INFORMATION

Call Title: Resilient and secure urban planning and new tools for EU territorial entities

Call Reference: HORIZON-CL3-2024-INFRA-01-02

Funding Programme: [Horizon Europe](#)

Link to the call: <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportuni...>

📅 Opening Date

27 June 2024

! Deadline

20 November 2024

👥 Working Group

Climate Adaptation Task Force

[Express My Interest](#)

SCOPE AND EXPECTED OUTCOMES

ExpectedOutcome:

Projects' results are expected to contribute to all of the following outcomes:

- Evaluation of the resilience of an urban and peri-urban environment, identification of weaknesses and recommendations for changes to organizational processes;
- Creation of new tools and cost-efficient security upgrades of urban infrastructures with possibilities of pooling and sharing of complex security systems, taking into account limited budgets of local authorities;
- Improved efficiency of the security forces and emergency services (police, firefighters, paramedics ...) for the benefit of the European citizens and residents;

CALL INFORMATION

**I would like to
express interest in
the call**

Express Interest in a Call

You can express interest in a call by providing details about your project idea, the role they envision in a potential project or their experience in a specific sector (e.g. good practices, initiatives, other projects).

**I would like to
express interest in
the call on behalf
of a stakeholder
from my region**

Express interest on behalf of a stakeholder

Although we recommend that you give access to the ERRIN website to your local stakeholders, if this is not possible, can express interest on their behalf.

**I have a project
idea for this call
and I am looking
for additional
partners**

Create a Partner Search

You can also create a partner search for a specific call, which can be particularly useful when a project is in development and specific partners are sought.

VIA University College

[Get in Touch](#)

Proposal information:

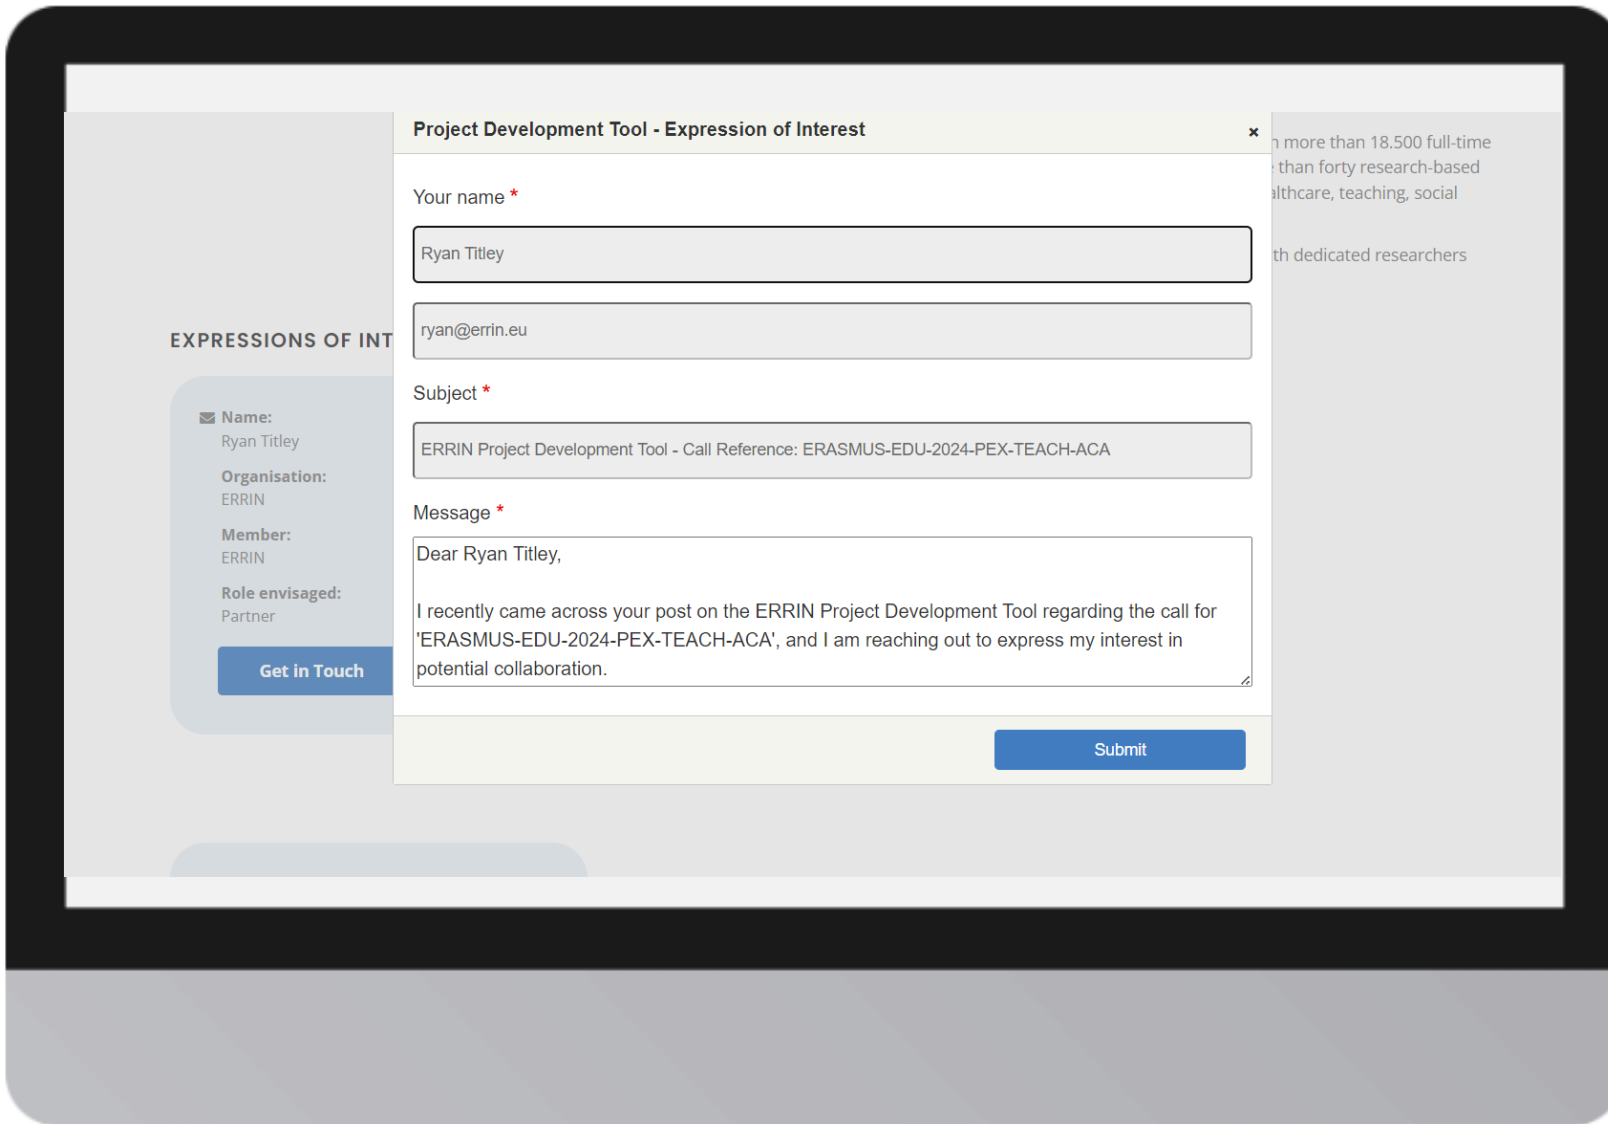

ARE YOU ACTIVE WITHIN NATURAL SCIENCES, HUMANITIES OR PEDAGOGY AND INTERESTED IN BUILDING A RESEARCH-DRIVEN NETWORK ON OUTDOOR LEARNING?

“Outdoor learning and pedagogy” is an emergent field of research, combining studies in teaching and learning with research on physical and mental health issues for both pupils and teachers. Being interdisciplinary in its nature, outdoor learning and pedagogy research combines research from natural sciences and humanities, as well as social sciences, e.g. pedagogy, psychology, physical development, teaching and learning.

At present, there are no existing formalised research networks in outdoor science teaching and learning which provides us with the momentum to build a new one now.

VIA University College, Research Program for Outdoor Pedagogy, is initiating a COST network addressing the development of new teaching methods, knowledge about effects and research communities and children’s ‘nature deficient syndromes’.
