## ESD TALK #2: UNCOVERING SKILLS FOR THE FUTURE IN HEALTHCARE

When: 22 May 14.00-14.45.

Where: Online webinar. Register [here](#).

Following the launch of ESD Talks as part of the Erasmus+ Centres of Vocational Excellence-project TEACH4SD, we are thrilled to announce ESD Talk #2 which will look into the health sector from the skills side. The healthcare sector is currently struggling with the increasing elderly population and the consequences of this (i.e. age-related diseases), which puts other requirements on the future workforce. In this second edition, we are proud to welcome Claire Nassiet, Head of Innovation Adoption & Healthcare Transformation, EIT Health, and Matilda Åberg-Wennerholm, Partnership /Collaboration Lead, EIT Health Scandinavia. Claire Nassiet and Mathilda Åberg-Wennerholm will present Pact for Skills for Partnership for the European Health Industry with a view on skills needed in the future and the green transition.

The webinar is hosted by the Erasmus+ project TEACH4SD and marks the second edition of four annual sessions during the four-year project. Join us as we address the current European state of art on green skills in education with our fellow EU partners.
